New Industrial Enclosures Catalogue

ROLEC have published their new comprehensive catalogue detailing their huge range of electronic enclosures and electrical enclosures for industrial applications. For the first time all the product sections have been combined into one easy to use handbook.

This 236 page colour catalogue provides design and installation engineers with a great source of high performance enclosures with ingress protection from IP54 to IP69K, The ordering information, drawings, material specifications and customising options are all set out in a clear and easy to use format.

The ROLEC product range includes die-cast housings in industry standard sizes, wall enclosures, terminal cases, push-button enclosures, front panel enclosures, command enclosures, EMC cases and ATEX Ex enclosures. The enclosures are manufactured from die-cast aluminium, ABS, polycarbonate, polyester or sheet steel. The range also includes suspension arm systems and cable glands.

For 2009, ROLEC have added two completely new lines, the unique die-cast handCASE hand-held enclosures, and the aluDISPLAY command and display enclosures. Other existing lines have also been extended.

The catalogue also includes examples of customised enclosures which have been machined, painted and printed. This service is designed to provide the customer with a fully finished enclosure ready for mounting the electrical and electronic components.

The new ROLEC catalogue can be requested online at:
