Suspension-System profiPLUS 70

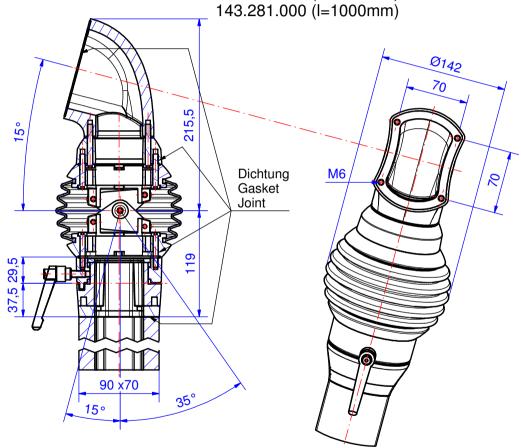

Type: Console coupling N, standing

Material-No.: 143.28*.***

143.280.250 (l= 250mm)

143.280.500 (l= 500mm)

143.280.750 (l= 750mm)

Suspension system material	GD-Al Si 12 (DIN 1706)
Profile material	Extruded aluminium
Gasket	4x Chloroprene (CR), black
Mounting screws	4x M6, galvanized steel
Ingress protection	IP54 EN 60529

Bending range	310°
Weight	3.320 g + profile 5.520 g/ m
Surface	Powder coating RAL 7035, light grey
Surface profile	Silver anodized
Tolerance	GTA 13/5 DIN 1688-4 (outside dimensions ±0,8mm)

143.280.250 Console coupling A, upright 250 mm

Product overview	
Material	Aluminium, Plastic (POM)
Color	RAL 7016, RAL 7035, Anodised silver
Weight (g)	4700 g

profiPLUS 70

THE PREMIUM DESIGN SUPPORT ARM SYSTEM

IP 54

The key product features:

- System parts material: diecast aluminium, powder coating, RAL 7035
- Suspension profile material: aluminium profile, in anodised silver
- Integrated cable protection in all joint parts
- Integrated set screw system for adjusting the pivoting range
- Many couplings with pre-fitted suspension profile as standard
- Can be used with all ROLEC control enclosures; the perfect complement to 'multiPANEL' and 'profiPANEL'
- Possible to route connectors such as HDMI, DVI, network adapters, etc.
- Comprehensive potential equalisation
- Gasket: chloroprene (CR)

profiPLUS 70 is a modern suspension arm system which combines ergonomic design with advanced technology. The highly attractive appearance perfectly matches the design of modern machines. profiPLUS 70 offers more room for cables and connections than the smaller profiPLUS 50 system. At the same time, the system's bearing strength is significantly higher.

The profiPLUS 70 system is designed for time-saving assembly. For this, ROLEC engineers have developed the "one-screw adjustment" feature which means the system can be fully adjusted by just a single screw. All system couplings are pre-fitted with a support profile as standard, saving assembly time. The ducts in the interior of the system provide space for multiple cables such as HDMI, DVI and network cables. Cable protectors are integrated into all rotating system elements as standard. Fully integrated electrical bonding protects operators and the machinery. A set screw system in the joints allows adjustment of the pivoting range in 30° steps. The range includes reducing adapter for connecting to the profiPLUS 50, thus making it possible to mount display panels from leading manufacturers such as Siemens, B&R and Beckhoff.

Feel free to use our practical suspension arm configurator. Please choose whether you want a horizontal or vertical alignment.

Principle

Economic, compact and elegant designer suspension arm system for medium to heavy loads

Additional info

Possible to connect control enclosures from leading manufacturers such as Siemens, Beckhoff, B&R and ROLEC

The spacious cable routing offers an optimum connection with all interfaces, sufficient space is available for a range of cables and connectors

Patented ROLEC solution for alignment of the complete system in a horizontal direction through a single set screw!

Continuous equipotential bonding, DIN VDE 0113 / EN 60204-1 / IEC 204-1

All couplings are equipped with pre-fitted support profile as standard

Integrated cable protection in all system parts

Optional: Signal light adapters for joint and elbow

Material/coating

Diecast aluminium alloy, powder coated RAL 7035 light grey

Optional: Special colours

Support profiles: Extruded aluminium profile, anodised silver, preformed fastening thread

Optional: Anodised special colours or powder coated

Covers: Plastic (POM), RAL 7015 slate grey

Bellows: PVC-P, RAL 7016 anthracite grey, temperature resistance: -30°C to +70°C

Gasket

Chloroprene O-ring gasket (CR)

Cable routing

Suitable for HDMI, patch cables, DVI, USB, cold-device plugs etc.

Ingress protection

IP 54 / EN 60529

Customising

Learn more about our full customising service for installation-ready enclosures

Full-Service-Products

Customization according to your wishes.

Everything begins with individual advice. We'll be pleased to support you with your project and find solutions for every requirement. Customer-specific solutions are our speciality.

Test our products with your internal mounting. We'll be pleased to send you a sample enclosure for inspection with no strings attached.

We'll manufacture every enclosure for you according to your exact specifications - whether they involve precise drilling or large tolerance.

Thanks to our modern CNC production, we can quickly and efficiently mill custom-fit cut-outs and contours to match your exact specifications.

Our services also include engraving your logo and other elements, which we can of course perform in any colour you desire.

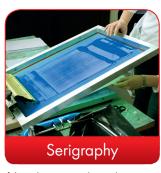

We can process stainless steel enclosures and plates quickly and reliably according to your individual requirements thanks to our in-house lasering centre.

We can powder coat enclosures, command enclosures and suspension systems in any RAL colour you desire. Custom colours are of course also possible.

We can also paint all our enclosures in any RAL colour you desire. The application of primer and special colour structures are possible, as well.

If desired, we can apply your logo and lettering or other markings using serigraph printing.

Digital printing is particularly worthwhile for low-volume orders and for realising complex parterns or images.

We offer our conFORM low-price standard EMC enclosure to protect your internal mounting against electromagnetic radiation. On request, we can also supply an EMC-compliant version of any other ROLEC enclosure.

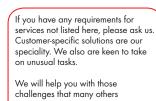

We are able to offer the right made-tomeasure display for all our enclosures - in varying sizes and degrees of robustness depending on the application.

ROLEC's portfolio also includes matching front plates, mounting plate, supporting rails and terminal blocks as well as a range of cable glands, blanking plugs etc.

Would you like to have all your components supplied already assembled?
No problem. Our assembly team will be pleased to perform all assembly work on your behalf.

Our Service

would give up on.
